

CNG systems

for passenger cars and light commercial vehicles

Powertrain systems and electrified mobility

Economical, efficient and sustainable

efficient

fewer CO₂ emissions than gasoline engines

reliable

Solutions from Bosch for CNG vehicles are as reliable and durable as solutions for gasoline powertrain systems.

- ▶ The number of vehicles with CNG (compressed natural gas) powertrain systems continues to rise around the globe
- ▶ Compared with liquid fuels, CNG produces far fewer CO₂ emissions and combusts virtually particle-free
- ▶ Bosch continues to systematically develop the CNG powertrain and offers reliable and durable systems and components for the fuel supply, fuel injection and engine management
- ▶ Bosch CNG technology applies for many different gas engines and vehicle types, for monofuel and bifuel applications, with medium-pressure and low-pressure systems, and for use in oil-free gas
- ▶ Bosch is the only provider of CNG systems worldwide with one injector family for all low-pressure classes
- ▶ With millions of components sold, Bosch has extensive system expertise and offers consulting services
